

The STM Publisher of Choice

For Leading Authors, Libraries and Readers

- ▶ Support from a team of dedicated professionals
- ▶ The reach, tools and experience to ensure maximum readership for your work
- ▶ Partner with Springer and publish with confidence

REACH
YOUR
READERS

Springer ► Your Partner in Publishing

Selecting the right publisher can be one of the most important decisions that an author will make. And today, choosing the right publisher is more important than ever. Digital delivery has become the new standard; and with it have come fundamental changes in the way that scientific content is produced, delivered and consumed. **The emergence of this digital infrastructure has brought its share of challenges, but it also promises a widening horizon of possibilities for authors to publish more research more quickly, and in formats that expand**

their reach to researchers and libraries on a truly global scale.

To realize this promise, it is essential that authors partner with a publisher who can deliver on the potential of these new opportunities. Over the last decade, Springer has led the industry in embracing this new digital infrastructure, meeting the technical challenges and pioneering new products to create more opportunities for our authors to reach their audience.

At Springer, You are in Good Company...

Innovation is critical and should be at the core of every publisher's strategy, but so should the values that make great publishing. Springer has been a leading STM publisher for 170 years and home to many of the world's foremost researchers, including more than 190 Nobel laureates. And our authors, editors and peer reviewers continue to be among the best in academic publishing. Springer is and has always been 'content led' with a firmly established reputation among librarians and researchers for providing only the highest quality research.

...And in Good Hands

At Springer, we recognize that our authors are the heart of what we do and we are committed to providing the resources, support and advice to help you succeed. Springer's team of committed, knowledgeable professionals will help guide you from manuscript to distribution, every step of the way. Your dedicated editor will provide expert guidance as you produce your manuscript and Springer's team of sales and marketing professionals have the knowledge and the resources to ensure that your work finds its audience.

Focus on Your Research and Leave the Rest to Us

Springer provides the support and the peace of mind to enable you to focus on what is most important: your research. We know publishing and we are constantly working to develop new ways to reach more readers more quickly, all while maintaining the rigid high standards and quality that researchers have come to expect.

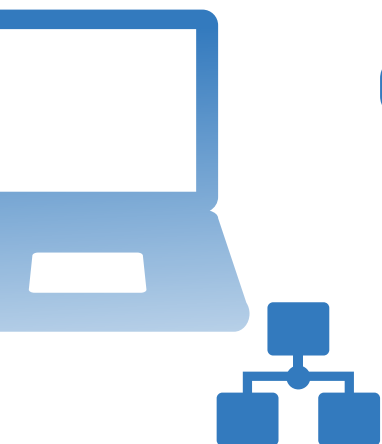

"Springer is an academic publisher with a good reputation and I knew that because they are so large, they could reach a lot of people.... I wanted someone to handle that aspect – the business side of it and the distribution side of it to know what is best to do."

► **JC Bradbury, Springer Economics Author**

"Very friendly, very supportive – Some of the best people that I have worked with in my professional life have come from Springer."

► **Michael Inglis, Springer Astronomy Author**

When you partner with Springer you can expect:

Help from our team of professionals

A team of dedicated experts to guide you through the process of producing and publishing your manuscript

Leading edge offerings and distribution models

An array of new digital products and mobile applications are complemented by inventive new offerings such as SpringerOpen, Springer's new range of peer-reviewed open access journals.

Reduced time to publication

With input from our many authors, Springer has refined and improved the methods used to publish journal articles and books and we have established a series of standardized production processes that ensure that your work is published in the briefest time possible.

Springer's Author Academy

A free program delivered online and in person to guide you through the process of writing and publishing a scientific manuscript ► springer.com/authoracademy

Mobile apps

Springer's mobile app for SpringerLink provides researchers convenient access to content from their mobile device.

Real time tracking

Follow the progress of your manuscript from submission to publication through your personalized MySpringer account. See ► springer.com/myspringer

Free tools

Springer provides a variety of helpful, cost-free tools that support your research and publishing endeavors:

Springer Realtime

realtime.springer.com ► insight into what content is being read by the scientific community, all over the world, as it is happening

AuthorMapper

authormapper.com ► enables document discovery based on author locations and geographic maps

LaTeXSearch

latexsearch.com ► affords the ability to search for LaTeX code within scientific publications

Springer Exemplar

springerexemplar.com ► find authentic examples of how a word or phrase is used in published literature

The Right Formats to Reach Your Audience

Every book is made available in three formats: eBook, Print and MyCopy personal soft copy editions for library patrons. As Springer books can always be printed on demand they will never go out of print. Journals too are delivered online; accessible any time from any location, and available through a subscription-based model as well as Open Access formats such as Open Choice and SpringerOpen. Today, Springer is the largest open access publisher. Working in close collaboration with our partner BioMed Central, Springer has developed the tools to support authors and societies seeking to publish through open access channels. These flexible delivery and publication methods facilitate higher usage, greater readership, more citations and additional royalties.

No matter your audience, Springer offers the right products:

Springer Link

- ▶ 5 million documents on a single platform for seamless search, discovery and access to EBooks and eJournals
- ▶ Flexible options for maximum readership
 - ▶ eBooks
 - ▶ eJournals – Subscription-based and Open Access

Springer Archives

- ▶ 2 million journal articles published before 1997. The electronic Archive will be expanded in 2012 to include tens of thousands of classic books dating back to the 1840's

Springer Reference

- ▶ A world-class collection of peer-reviewed, living eReferences constantly updated online as developments warrant

Springer Materials

- ▶ The world's largest resource for physical and chemical data in material science

Springer Protocols

- ▶ The most comprehensive collection of peer-reviewed life science protocols

Springer Images

- ▶ A database of more than 3 million scientific, technical and medical images

Let Us Help You Find Your Audience

Our marketing experts have the experience and the tools to ensure global visibility and **maximum readership for your content**. And Springer's experienced sales team will effectively promote your work to libraries and readers worldwide. In addition, Springer provides tools to assist authors in elevating their own profile and marketing their research.

Digital delivery and growth of social media has fostered new methods of marketing content and reaching potential audiences. Communities of researchers now take their discussions online, sharing ideas and furthering knowledge in their chosen subject with global participation. Springer has developed a number of resources to assist authors who wish to establish their online profile and engage in these efforts.

Springer's Author Services help our authors help themselves:

- ▶ We provide authors with tools and guidance to enable them to establish an online profile and engage peers and potential readers directly

- ▶ Localized staff in many countries, including China, India, Brazil engages in direct communication with researchers

- ▶ For more information on Springer's rich suite of author services, visit ▶ springer.com/authors

...And Your Audience Find You

Springer content is easily discovered and accessed. More importantly, it is frequently cited, confirmation of the high regard that researchers have for our authors and our content.

Researchers today have more and more resources at their disposal, but often lack the tools to locate very specific areas of information. In addition, with the increased availability of digital content, the ability to locate information that is both relevant and trusted is critical. To that purpose, all Springer content is easily found and accessed from the widest selection of discovery points, expanding the potential audience for your research.

- ▶ Downloadable content is delivered through SpringerLink, a single, fully searchable platform,

which integrates journal, book and reference materials.

► All Springer content is indexed, searchable and easily found from all common discovery points such as your library catalog and Google.

► **Full indexing enhances SEO** (Search Engine Optimization), increasing the likelihood that your content will show up in search results.

► With **semantic linking, chapter previews, and cross-linking between books and journals**, we give readers every opportunity to find your work.

► Springer's **mobile apps** for SpringerLink and SpringerImages provide researchers with a conveniently optimized interface for finding and accessing content from their mobile device.

In today's modern libraries, where most resources are available electronically, the entire library catalog

can be part of a connected network of research. This network of information enables 'long-tail' discovery of resources. Because content is easily searched and linked, researchers can quickly locate relevant information regardless of the source. Texts that were once obscure or perceived to be out of date are finding new life in this 'long-tail' environment. Springer's digital subject collections, which include many classic foundation texts alongside contemporary research are enabling audiences to access works that were once difficult to locate, expanding the audience and extending the life for those works. With perpetual access, intertextual linking and no physical space required, eBooks and eJournals have a much longer life than print editions.

Innovation Matters, Today More than Ever – And Springer is Leading the Way

The pace of change that academic publishing has seen in recent years is just the beginning of a process that will unfold with increasing rapidity in the future. Inventions in one area of life or business will be quickly adopted in others, further accelerating developments. While it is difficult to predict where these changes will ultimately take us, publishers should embrace these technological developments and leverage them for success. Innovation leads to new products and new audiences. At Springer, this culture of innovation is a core value. We are making the investments to ensure that our authors enjoy success today and into the future. Let's look more closely at three offerings that exemplify this innovation culture: SpringerOpen, SpringerReference and SpringerBriefs.

SpringerOpen

In the last few years, Open Access publishing has emerged as a successful alternative to traditional journal subscriptions. SpringerOpen, our portfolio of peer-reviewed fully open access journals in all areas of science, technology and medicine enables authors to satisfy open access mandates with the peace of mind that comes from working with a trusted partner like Springer. With SpringerOpen, authors retain all copyrights while broadening distribution to the largest possible audience, maximizing visibility and citations.

In 2012, **SpringerPlus** extends our Open Access offer with the option of an interdisciplinary journal covering all areas in science, technology and medicine.

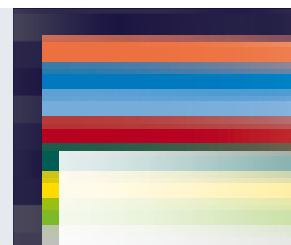

SpringerReference

Springerreference.com uses an industry first publishing model to deliver living editions of Springer's trusted eReferences well in advance of print or eBook editions. SpringerReference starts with the latest editions of Springer's Reference Works across every subject and enables leading scientists to submit dynamic updates as scientific discoveries occur. Prior to posting, these 'LiveReference' updates are peer-reviewed to ensure that all content on springerreference.com meets the same high standards for quality and integrity that libraries and researchers have come to expect from Springer's reference works.

SpringerBriefs

In 2010, Springer began publishing SpringerBriefs, 50 to 125 page monographs on a focused topic. Publishing through SpringerBriefs enables authors to have a version of their work rapidly distributed to a global audience. SpringerBriefs also enjoy streamlined back-end processes that reduce time to market without sacrificing quality. Standard publishing contracts, easy-to-use manuscript preparation and formatting guidelines all result in expedited production schedules that enable SpringerBriefs to be published in 8-12 weeks after acceptance.

Springer is leading the way

In Digital Products

- ▶ **All on One Platform – Multiple Formats and Delivery Options**
EBooks, eJournals, eReferences and protocols delivered on a single, searchable platform means easy access and discovery for readers
- ▶ **Critical Content Available When and Where Readers Need It**
Optimized delivery on PC's or a patron's choice of mobile device with Springer Apps
- ▶ **Books: One Manuscript – Multiple outputs**
Traditional print books, eBooks and MyCopy soft cover editions
- ▶ **Industry First Products**
like SpringerReference, SpringerBriefs, Open Choice and others

In New Distribution Models

- ▶ Springer expands your reach to libraries of all sizes, worldwide from Community Colleges to the leading Research Institutions
- ▶ Springer is leading the way in Open Access Publishing in collaboration with BioMed Central and through SpringerOpen
- ▶ Springer provides content in convenient, subject specific collections providing cost-effective solutions to libraries with limited budgets and space

In Speed to Market

- ▶ Streamlined processes and interactive author tools enable your book to be published quickly
- ▶ Springer enables early availability of books both electronic and in print with Amazon, Google Books and many more partners
- ▶ Consecutive article publishing offers the fastest possible speed to market. Your article is enabled for immediate citations and has a stable online location from the moment it is published
- ▶ Springer's Online First program for journals enables the digital edition to be published immediately while the print version follows

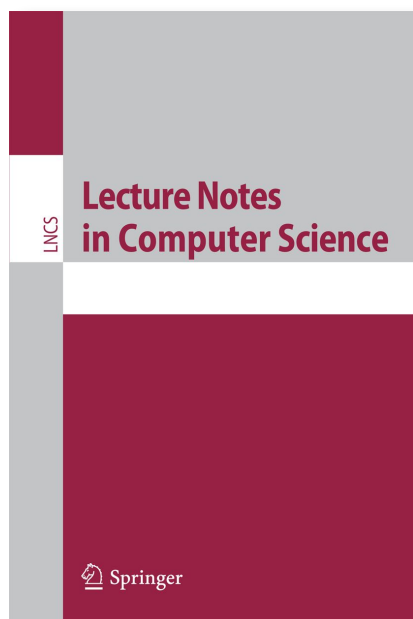

Springer ▶ Your Partner in Publishing

About SpringerLink

Springerlink.com provides easy access to a library of more than 5 million documents spanning the universe of scientific research. This constantly expanding library includes more than 2,600 peer reviewed journals including numerous journals published under Open Access mandates. The Springer eBook collections comprise more than 50,000 titles and feature research from the world's foremost scholars, including the work of more than 190 Nobel Laureates. In addition, SpringerLink delivers a world-class collection of more than 200 eReferences and the most comprehensive collection of Life Science Protocols (25,000+) available on any platform. And SpringerArchives provides researchers with a link to the great discoveries of the past, delivering access to a collection of more than 2 million journal articles published before 1997.

About Springer

Springer is the largest publisher of STM books and the second-largest publisher of journals in the science, technology, and medicine (STM) sector. We publish on behalf of more than 300 academic associations and professional societies. Springer is part of Springer Science+Business Media, one of the world's leading suppliers of scientific and specialist literature. And Springer now has operations in over 20 countries in Europe, the USA, and Asia, with more than 5,000 colleagues who are ready to support you.

Lecture Notes in Computer Science

Series Editors: D. Hutchison (et al.)

The series Lecture Notes in Computer Science (LNCS), including its subseries Lecture Notes in Artificial Intelligence (LNAI) and Lecture Notes in Bioinformatics (LNBI), has established itself as a medium for the publication of new developments in computer science and information technology research and teaching - quickly, informally, and at a high level.

The cornerstone of LNCS's editorial policy is its unwavering commitment to report the latest results from all areas of computer science and information technology research, development, and education. LNCS has always enjoyed close cooperation with the computer science R & D community, with numerous renowned academics, and with prestigious institutes and learned societies. Our mission is to serve this community by providing a most valuable publication service.

LNCS commenced publication in 1973 and quite rapidly attracted attention, not least because of its thus far unprecedented publication turnaround times. The 1980s and 1990s witnessed a substantial growth in the series, particularly in terms of volumes published. In the late 1990s we developed a systematic approach to providing LNCS in a full-text electronic version, in parallel to the printed books. Another new feature introduced in the late 1990s was the conceptualization of a couple of color-cover sublines. Still, original research results reported in proceedings and postproceedings remain the core of LNCS.

Introducing SpringerBriefs

A new way to publish

Springer is delighted to announce **SpringerBriefs**, concise summaries of cutting-edge research and practical applications across a wide spectrum of fields. Featuring compact softcover volumes of 50 to 125 pages, the series covers a range of content from professional to academic.

Typical topics might include:

- A timely report of state-of-the art analytical techniques
- A bridge between new research results published in journal articles and a contextual literature review
- A snapshot of a hot or emerging topic
- An in-depth case study or clinical example
- A presentation of core concepts that students must understand in order to make independent contributions

Author Benefits

- ▶ Briefs allow authors to present their ideas and readers to absorb them with minimal time investment
- ▶ Briefs will be published as part of Springer's eBook collection, with millions of users worldwide. In addition, Briefs will be available for individual print and electronic purchase.
- ▶ Briefs are characterized by fast, global electronic dissemination and standard publishing contracts
- ▶ Books in the program will benefit from easy-to-use manuscript preparation and formatting guidelines, and expedited production schedules. We aim for publication 8-12 weeks after acceptance.
- ▶ Both solicited and unsolicited manuscripts are considered for publication in this series. Projects will be submitted to editorial review by series editors, editorial advisory boards, and/or publishing editors.

SpringerBriefs in a nutshell

SpringerBriefs specifications vary depending on the title, but generally, each Brief will have:

- ▶ 50-125 typeset pages, including all tables, figures, illustrations, notes, references, etc.
- ▶ Softcover binding
- ▶ Versions in print and eBook so readers have access 24 hours a day
- ▶ A very quick turnaround to reach the market quickly

Get Read. Publish With Springer.

Do you want the widest possible continuous readership for your book?

When you publish with Springer, your work will:

- ▶ always be available in print thanks to print-on-demand
- ▶ be accessible 24/7 worldwide online
- ▶ be available to students and peers for 24.99 EUR/USD

Let your book benefit from being part of the largest *Computer Science* eBook Collection

Springer's leading eBook Collection is widely used in academic, governmental and corporate libraries. Your book will benefit from cross-linking and increased usage through seamless integration with other content on our online platform SpringerLink.

SpringerLink attracts over 230 million visits per year, and the Computer Science Collections has:

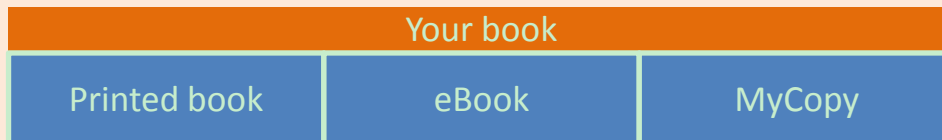

- ▶ more than 14,000 eBooks currently available (textbooks, monographs, edited volumes, proceedings)
- ▶ 14 online reference works currently available
- ▶ more than 1,100 new eBooks added per year
- ▶ more than 150 online journals

When you publish your book with Springer you will profit from the high usage and visibility of this Collection.

The average number of chapter downloads per eBook in this Collection was 3,496 in 2013.

Your book will also be fully hyperlinked and conveniently searchable, qualities that have made eBooks a widely adopted format.

Give your readers the choice of how to access your book

MyCopy – your book available for 24.99 EUR/USD

Springer offers readers a convenient way to obtain a printed version of your eBook file for personal use: MyCopy.

It allows library patrons to order a softcover for 24.99 EUR/USD, provided their library has access to Springer's eBook Collection.

The MyCopy service is expanding and is currently available in 20 countries. See springer.com/mycopy

This unique format will boost the popularity of your book.

Get a wider readership and increased longevity for your book

With Springer's multi-format publishing model, your work is ensured of continuous readership:

- ▶ As an eBook your work becomes accessible 24/7 worldwide online and on e-reading devices
- ▶ eBook usage has proven to remain high for years after publication
- ▶ Library patrons can order a highly affordable MyCopy edition
- ▶ Through print-on-demand your book will always be available in print

Get the Attention Your Work Deserves

We nurture relationships with our authors and maintain close ties to the community. Springer remains your trusted publishing partner in Computer Science.
